

**LTC REFORM TOWN HALL MEETING
FEBRUARY 7, 2:00 P.M.**

- Consumer Representation (list on web?)
- More input opportunities
- Self directed service – commitment to
- 1 CMO vs. 2 ADRC's – does not make sense
 - easier to centralize I & A
 - service delivery should be close to the consumer
- Who is working on “Provider Network” and covered services
- We don't want CMO to determine what SDS means:
 - More than just select my attendant
 - Ability to opt out of 30-day RN visit
 - Other choices
- Elders in rural areas trust local case management agencies; it will be harder for them to contact a central ADRC
- If villages keep funding local case management, can there be a collaborative working relationship with the ADRC and reformed system?
- Having focal points perform some ADRC functions - F.P. need reimbursement for this
- What about criminal background checks?
- How is it decided if one goes into Partnership or Family Care?
- Suggestion: get the word out better regarding website and other information sources
- What will attendants be allowed to do? Drive consumer? Grocery shop? Other helpful activities?
- Have a chart that compares benefits COP/CIP vs. Family Care vs. Partnership, etc.
- RN delegation under managed care? Answer: yes, it is possible within nurse delegation regulations.
- Consumer input before final report is submitted to WDHFS
- Assertive outreach to low income, rural and minority populations
